G20-06

GUIDELINES FOR TIER 2 RESTRICTED COMPONENTS SELLERS

Explosives Regulatory Division

June 2022

Également disponible en français sous le titre : <u>Lignes directrices pour les vendeurs de</u> composants d'explosif limités de niveau 2

Disclaimer

This document is intended to help stakeholders understand the requirements when selling or storing a Tier 2 restricted component. This document does not replace nor contain all the requirements from the *Explosives Act* (the Act) or the *Explosives Regulations*, 2013 (the Regulations). The requirements listed in this document are not all written in the exact text from the Regulations. In the event of any inconsistency or conflict between this document and the Act or its Regulations, legislation takes precedence.

Effective Date and Review

These guidelines are currently effective and will be updated, as needed, to provide further clarity if any issues are discovered. The most recent version of this document, and other documents related to restricted components, can be found on the <u>Natural</u> Resources Canada website.

1. Introduction

1.1 Purpose

Restricted components are chemicals that have everyday legitimate uses. However, when in the wrong hands, these chemicals can be turned into homemade explosives. The purpose of this document is to provide guidance and a clear interpretation of <u>Part 20 of the Explosives Regulations</u>, 2013 regarding **Tier 2 restricted components only**.

This document applies to you if you are a component or product seller of a Tier 2 component.

Product sellers using aluminum powder or hexamethylenetetramine to manufacture a product for sale are exempt from the regulations.

Tier 2 components are:

Item	Name of component (Chemical Abstracts Service Registry Number [CAS RN]) and concentration expressed as a percentage by weight (w/w)
1	Hydrogen peroxide (CAS RN 7722-84-1) at a concentration of at least 30% w/w
2	Nitromethane (CAS RN 75-52-5) at a concentration of at least 90% w/w
3	Potassium chlorate (CAS RN 3811-04-9) at a concentration of at least 90% w/w
4	Potassium perchlorate (CAS RN7778-74-7) at a concentration of at least 90% w/w
5	Sodium chlorate (CAS RN 7775-09-9) in solid form at a concentration of at least 90% w/w
6	Nitric acid (CAS RN 7697-37-2) at a concentration of at least 75% w/w
7	Potassium nitrate (CAS RN 7757-79-1) at a concentration of at least 90% w/w
8	Sodium nitrate (CAS RN 7631-99-4) and potassium nitrate (CAS RN 7757-79-1) mixture at a concentration of at least 90% w/w
9	Sodium nitrate (CAS RN 7631-99-4) in solid form at a concentration of at least 90% w/w
10	Hexamethylenetetramine (CAS RN100-97-0) at a concentration of at least 90% w/w
11	Aluminum powder (CAS RN 7429-90-5) in dry form at a concentration of at least 70% w/w and with a particle size of less than 200 µm

The Regulations do not apply if you are storing a Tier 2 component for end use (i.e., you are not selling the Tier 2 component or manufacturing a product that you will sell using a Tier 2 component).

A full list of all restricted components can be found in Appendix A.

1.2 Background

The Explosives Regulatory Division (ERD), which is part of Natural Resources Canada (NRCan), administers the Explosives Act and its Regulations. Part 20 of the Regulations restricts the sale of restricted components and sets out the requirements for their acquisition, sale and secure storage. Given the history of attacks involving homemade

explosives globally, Canada is taking proactive steps to help mitigate potential threats before events occur.

The Regulations and this document use the following definitions:

Component seller – a person who sells a restricted component

Product seller – a person who manufactures a product, other than an explosive, for sale using a restricted component

Important

A person who is using hexamine or aluminum powder to manufacture a product for sale is exempt from the regulations.

See Appendix B for more information and examples regarding component and product sellers.

1.3 Scope

These guidelines apply to requirements related to the secure storage and sale of Tier 2 restricted components.

The scope of this document excludes:

- Instructions on how to enrol as a seller of a Tier 2 restricted component. To understand how to enroll, see <u>G20-03 Guide for Enrolments for Restricted</u> Component Sellers eLMS.
- Detailed descriptions on how to identify suspicious activities and transactions. For more information, see <u>G20-04</u> – <u>Guidelines for Recognizing and Reporting</u> <u>Suspicious Transactions of Explosives Precursor Chemicals.</u>
- Requirements for Tier 1 restricted components. For more information, see <u>G20-05 Guideline for Tier 1 Restricted Component Sellers.</u>
- Requirements for Tier 3 restricted components. For more information, see <u>G20-07 –</u> Guideline for Tier 3 Restricted Component Sellers.

2. Regulations

As a component or product seller of Tier 2 components, you are subject to certain requirements:

- Enrolment requirements
- Security requirements
- Transaction requirements
- Reporting requirements

The following table provides a brief summary of the regulatory requirements for sellers of each tier:

Requirements	Tier 1	Tier 2	Tier 3
Enrol with NRCan	✓	~	X
Control access to the components	/	~	X
Implement security and key control plans	V	×	Х
Control inventory	✓	~	X
Submit an annual inventory to NRCan	✓	X	X
Verify ID and record sales	✓	~	X
Refuse a suspicious transaction	✓	~	✓
Report incidents	✓	✓	'

ERD inspects component and product seller sites across Canada to verify that these requirements are being met. Many elements in this document will be assessed during an inspection at your site. It is important to ensure that all employees dealing with Tier 2 components are trained and aware of the requirements.

In addition to this document, self-guided training for component and product sellers of Tier 1 and Tier 2 components is available on our <u>website</u>.

Sections 2.1 to 2.4 below define requirements from Part 20 of the *Explosives Regulations*, 2013 (ER, 2013) and provide guidance on how you can meet regulatory requirements.

Important

These Guidelines do not include all sections of the Regulations and are not written with the exact same text found in the Regulations (for length and clarity purposes). These Guidelines do not replace the Regulations. Please consult the referenced sections.

2.1 Enrolment Requirements

(Sections 496 to 502 of ER, 2013)

Component and product sellers must ensure that they have a valid enrolment.

Section	Requirement	Guidance
496 to 499	Only component and product sellers who are enrolled with NRCan are authorized to sell a Tier 2 component.	You must receive your enrolment prior to selling Tier 2 components or manufacturing a product for sale using Tier 2 components. • There is no fee for an enrolment and it is valid for five years. • The location of all sites where Tier 2 components are sold or stored must be part of the enrolment. Visit the NRCan eServices Portal to enrol.

502	Any change to an enrolment must be reported to NRCan within 10 days of the change.	Any change made to information regarding your enrolment must be reported. This includes the authorized contact, mailing address, telephone number, email address, type and quantity of restricted component, site address and site contact. An amendment can be done on the NRCan eServices Portal.
-----	--	---

2.2 Security Requirements (Sections 503 to 507 of ER, 2013)

Component and product sellers of Tier 2 restricted components must ensure that security requirements are met when storing components.

2.2.1 Storage

Section	Requirement	Guidance
504	A Tier 2 component can only be stored at or sold from a location that has been disclosed in an enrolment application or a notice of change.	 All the locations where you store or sell Tier 2 components must be on your enrolment application. Storage at ports or transfer stations is not required if the component is at those locations during transportation. Sales or repackaging should not occur. If sales or repackaging occurs at these locations, this site should be on your enrolment application. A sales office without Tier 2 component storage must be listed if it is the location where sales are made and where records of sale are kept. If you store your components at a third-party location, you must include this site on your enrolment application. The third-party location must not handle any sales, but if it does, it must enrol the company separately.
505(1)	A Tier 2 component must be locked up when it is not attended.	Tier 2 components must be kept secure in an area that can be locked. For example, the components can be kept in a locked cabinet on the store floor, in a storage room that customers cannot access or behind the sales counter.
505(2)	A sign that warns against unauthorized access must be posted outside of each entrance of a location where a Tier 2 component is stored.	These signs will warn individuals that they should not be in a restricted area. These signs will also prevent individuals from wandering into the wrong area.

		The wording on the signs is up to you, but it must warn against unauthorized access. For example: Restricted area No entry No unauthorized access beyond this point No customers beyond this point Exterior doors that are locked at all times and not accessible from the outside do not need a sign. For shipping areas, individuals should not be wandering around the warehouse. A sign should be placed where they enter the building to let them know where they should wait. Signs should also be placed on doors exiting the administration area into the storage area.
505(3)	Access to Tier 2 components must be limited to people authorized by the component seller or product seller.	Customers must never have unauthorized access to the Tier 2 components and must make a request to an employee to purchase them. The component or product seller must authorize which employees will have access to Tier 2 components. It may not be everyone in your organization who needs access to these chemicals.
506	A list of employees who work at each location where a Tier 2 component is stored or sold must be kept at the location.	In case of an incident, the police may require a list of employees working at your location. This will ensure a quick process if it is needed.
507(1)	A stock management system must be put in place to account for a Tier 2 component that is under the control of the component seller or product seller.	As a component seller or product seller, you have the responsibility to keep track of your stock. There is no template on how a stock management system should be set up. It can be kept via computer or on paper. It must show the stock you have on hand each day. In case of theft, you will be able to inform the police of the exact number of missing chemicals.
507(2)	Weekly inspections of the component must be carried out. A record of the results of each inspection, including any loss or tampering and the cause of any loss that is not attributable to normal operations, must be kept for two years after the record is made.	This is a visual inspection of the storage area. A record that includes the date of the inspection, record of any issues and the initials of the person responsible for it is sufficient. If there is more than one storage area, it must be indicated on the record. A weekly inspection record template can be found in Appendix E.

2.3 Transaction Requirements (Sections 509[1] to 513 of ER, 2013)

The following requirements must be applied when making a sale of a Tier 2 restricted component. These requirements do not apply to product sellers since they do not sell restricted components.

2.3.1 Requirements during the Sale

	uirements during the Sale	
Section	Requirement	Guidance
510	 Before a Tier 2 component is sold, the buyer is required to establish their identity. If the buyer will use the component to manufacture an explosive, the buyer's licence or certificate number is required. If the buyer intends to resell the component, the seller's restricted component enrolment number is required. In all other cases, other forms of identification can be provided. The most common will be a piece of identification issued by the Government of Canada or a provincial, municipal or foreign government displaying a photograph of the buyer. 	Before each sale of a Tier 2 component, an identify verification is always required, no matter the quantity a customer wants to buy. This could be a deterrent to some individuals who wish to buy the product to cause harm, as they would not want to disclose their identity. See Appendix C for a list of all acceptable forms of identification. If an individual refuses to show identification, you must deny the sale. Note: If you are selling a Tier 2 component to someone who will be reselling it, the only acceptable identification method is a proof of their enrolment with NRCan. They may not use other forms of identification. Ensure to ask your customers if they plan to resell the component so that you are checking and recording the appropriate piece of identification.
512(1), (4)	Every sale of a Tier 2 component in a quantity of more than what is listed in Appendix A must be recorded. The records must be kept for two years after the date of the sale.	Records of sale help keep track of buyers. In almost every situation, purchases will be legitimate. However, if something feels suspicious, having more information about a buyer will help the police with their investigation. Records of sale can be kept in the format of your choice and do not have to be all contained on one sheet. However, all the information must be retrievable upon request.

		See Appendix C for the complete list of details that must be recorded during a sale.
512(2)	If a Tier 2 component seller has an annual sales contract with the buyer, the information required under paragraphs (a), (d) and (i) listed in Appendix C under Record of Sale must be recorded only once per calendar year.	To make things easier for the seller and, given that this information will usually remain unchanged, certain information must be recorded only once per year and include this information: • The type of identification type and identification number • The buyer's name, address and telephone number • A description of how the component will be used
512(3)	Records of sale must be kept locked up when they are not being used and must be made available only to a person who needs access to them in the course of their employment.	Ensure records of sale are kept out of reach and view of customers. An individual trying to acquire restricted components who has access to your records could attempt to locate the restricted components stored by your customers. Records of sale should be locked up if they can not be kept in an inaccessible area. If they are saved on a computer, the computer should be password-protected.

2.3.2 Suspicious Transaction

Section	Requirement	Guidance
509(1), 513	A sale of a Tier 2 component must be refused by a component seller or their employees if the component seller or their employee has reasonable grounds to suspect that the component will be used for a criminal purpose.	The Regulations give you the right to refuse a suspicious purchase of a Tier 2 component and make it your legal duty to do so. There are legitimate reasons why individuals must purchase these components and it may be normal for them to exhibit some suspicious behaviours. However, it is a combination of multiple factors that could lead you to feeling something is suspicious. Use your judgement to determine if a transaction is suspicious. Do this on a case-by-case basis. You know your business best.
		It is understood that not every suspicious transaction will be noticed. However, having employees aware of suspicious behaviours can help prevent the risk of these components getting into the hands of those who wish to harm our communities.

	For more details, see <u>G20-04 – Guidelines for</u> Recognizing and Reporting Suspicious Transactions of Explosives Precursor Chemicals. There is also a chemical security awareness training video available to help identify suspicious behaviours in the retail setting.
--	--

2.4 Reporting Requirements (Sections 508 and 509[2] of ER, 2013)

For certain activities and incidents, there are reporting requirements.

2.4.1 Theft, Attempted Theft or Tampering

Section	Requirement	Guidance
508	If a component or product seller discovers any theft or attempted theft of, or tampering with, a Tier 2 component: Immediately inform the local police force Inform the Chief Inspector of Explosives within 24 hours Submit a written incident report to the Chief Inspector of Explosives when circumstances permit	Reporting these activities to the police could stop the component from being used for criminal purposes. ERD keeps track of all reported incidents relating to restricted components. The local police may only be aware of what is happening in their own jurisdiction, but ERD is able to see the bigger picture in terms of incidents across Canada. ERD collaborates with the police. For theft, attempted theft and tampering, please report to: Your local police or the RCMP National Security Information Network at 1-800-420-5805 The Explosives Regulatory Division at 1-855-912-0012 You can use the Incident Report – Explosives and Restricted Components form to submit a written report to ERD.

2.4.2 Refusal to Sell

Section	Requirement	Guidance
509(2)	Every refusal to sell a Tier 2 component must be reported to the Chief Inspector of Explosives and to the local police force within 24 hours after the refusal.	The police must be notified so they can start an investigation if needed. Provide the police with all information you can remember about the individual and the incident. ERD is notified for tracking purposes. ERD uses reported information to alert other sellers in a geographic region regarding the suspicious requests, if warranted. ERD will also collaborate with police. For a refusal to sell, please report to: Your local police or the RCMP National Security Information Network at 1-800-420-5805 The Explosives Regulatory Division at 1-855-912-0012

Appendix A – Restricted Components

The following tables contain the list of restricted components. If you are selling them in quantities that are listed below or lesser, you are exempted from taking records of sale. Note that records of sales are not required for Tier 3 restricted components.

Tier 1 Restricted Components

Item	Name of component (Chemical Abstracts Service Registry Number [CAS RN]) and concentration expressed as a percentage by weight (w/w)	Quantity
1	Ammonium nitrate (CAS RN 6484-52-2) in solid form at a concentration of at least 28% w/w of nitrogen in relation to ammonium nitrate	1 kg
2	Calcium ammonium nitrate (a) That is a mixture of the following essential ingredients: (i) ammonium nitrate and calcium carbonate (ii) ammonium nitrate and calcium magnesium carbonate, or (iii) ammonium nitrate, calcium carbonate and calcium magnesium carbonate (b) That is prepared as homogeneous prills or granules (c) That has a maximum combustible material content, expressed as carbon, of 0.4% w/w, and (d) That has a minimum content of carbonates of 20% w/w at a minimum purity level of 90% w/w	1 kg

Tier 2 Restricted Components

Item	Name of component (Chemical Abstracts Service Registry Number [CAS RN]) and concentration expressed as a percentage by weight (w/w)	Quantity (Records of sale exemptions)
1	Hydrogen peroxide (CAS RN 7722-84-1) at a concentration of at least 30% w/w	1 L
2	Nitromethane (CAS RN 75-52-5) at a concentration of at least 90% w/w	1 L
3	Potassium chlorate (CAS RN 3811-04-9) at a concentration of at least 90% w/w	1 kg
4	Potassium perchlorate (CAS RN7778-74-7) at a concentration of at least 90% w/w	10 kg
5	Sodium chlorate (CAS RN 7775-09-9) in solid form at a concentration of at least 90% w/w	1 kg
6	Nitric acid (CAS RN 7697-37-2) at a concentration of at least 75% w/w	4 L
7	Potassium nitrate (CAS RN 7757-79-1) at a concentration of at least 90% w/w	25 kg

8	Sodium nitrate (CAS RN 7631-99-4) and potassium nitrate (CAS RN 7757-79-1) mixture at a concentration of at least 90% w/w	25 kg
9	Sodium nitrate (CAS RN 7631-99-4) in solid form at a concentration of at least 90% w/w	25 kg
10	Hexamethylenetetramine (CAS RN100-97-0) at a concentration of at least 90% w/w	0 kg
11	Aluminum powder (CAS RN 7429-90-5) in dry form at a concentration of at least 70% w/w and with a particle size of less than 200 µm	1 kg

Tier 3 Restricted Components

Item	Name of component (Chemical Abstracts Service Registry Number [CAS RN]) and concentration expressed as a percentage by weight (w/w)
1	Acetone (CAS RN 67-64-1) at a concentration of at least 90% w/w
2	Ammonium nitrate (CAS RN 6484-52-2) in solid form at a concentration of at least 28% w/w of nitrogen in relation to ammonium nitrate, contained in a cold pack
3	Calcium ammonium nitrate (a) That is a mixture of the following essential ingredients: (i) ammonium nitrate and calcium carbonate (ii) ammonium nitrate and calcium magnesium carbonate, or (iii) ammonium nitrate, calcium carbonate and calcium magnesium carbonate (b) That is prepared as homogeneous prills or granules (c) That has a maximum combustible material content, expressed as carbon, of 0.4% w/w (d) That has a minimum content of carbonates of 20% w/w at a minimum purity level of 90% w/w, and (e) That is contained in a cold pack

Appendix B – Component Sellers and Product Sellers

Only sellers of restricted components or manufacturers using a restricted component to manufacture a product for sale (other than an explosive) are subject to Part 20 of the Regulations. Some definitions and examples are provided below to help you better understand the difference between component seller and product seller.

What is a component seller?

A component seller is a person who sells a restricted component.

Example:

A person selling hydrogen peroxide at a concentration of 35 % is a component seller because this person sells the restricted component itself.

What are some examples of restricted components that could be sold?

Most restricted components are sold using their chemical name so they are easy to identify. Some common products you could be selling in your sales establishment that are restricted components (and are sold under a different name) are:

- Stump remover (solid potassium nitrate)
- Saltpeter for meat curing (potassium nitrate)
- Solid camping fuel tablets (made with hexamine)
- Hair developer (hydrogen peroxide, regulated when concentration is 30% or greater)
- Acetone based nail polish remover
- Instant cold packs that contain ammonium nitrate or calcium ammonium nitrate
- Acetone based paint thinner

If you are unsure, please contact your supplier first for more information and ERD if still required.

What is a product seller?

A product seller is a person who manufactures a product, other than an explosive, for sale using a restricted component.

Example 1:

If a person adds potassium nitrate to a fertilizer blend resold to garden centres, this person making the fertilizer blend is considered a product seller and is subject to the Regulations.

Since the concentration of potassium nitrate in the fertilizer mixture is below 90%, the product is not a restricted component. Therefore, the garden centre purchasing and selling the fertilizer does not fall under the Regulations.

Example 2:

If a person is using hydrogen peroxide at a concentration and diluting it to 29% for resale, this person in a product seller and is subject to the Regulations. Since the concentration of hydrogen peroxide is now below 30 % it is no longer a restricted component and the buyers purchasing hydrogen peroxide at a concentration of 29% are not subject to the Regulations.

What happens if I am both a component seller and a product seller?

If you are both a component seller and a product seller, enrol as a component seller. That will cover you for both activities of selling components and selling products.

Appendix C - Sale Requirements

Identification

Section 510 of the Regulations -

Before a Tier 2 component is sold, the buyer must be required to establish their identity by providing

- (a) if the buyer intends to use the component to manufacture an explosive and a licence or certificate is required for that purpose, the number of the buyer's licence or certificate:
- (b) if the buyer intends to sell the component, proof that the buyer is included on the component sellers list; and
- (c) in all other cases,
 - (i) a piece of identification, issued by the Government of Canada or a provincial, municipal or foreign government, that bears a photograph of the buyer,
 - (ii) two pieces of identification, each of which sets out the buyer's name, at least one of which is issued by the Government of Canada or a provincial, municipal or foreign government, and at least one of which sets out the buyer's address,
 - (iii) the buyer's provincial pesticide licence,
 - (iv) proof that a registration of an agricultural operation with the Quebec Ministry of Agriculture, Fisheries and Food is assigned to the buyer,
 - (v) proof of the buyer's Ontario Federation of Agriculture number, or
 - (vi) proof of the buyer's registration under the <u>Controlled Goods Regulations</u>.

Record of Sale

Section 512(1) of the Regulations -

A record of each sale of a Tier 2 component must be kept for two years after the date of the sale. The record must include the following information and documents:

- (a) the buyer's name, address and telephone number;
- (b) the date of the sale;
- (c) the bill of lading, sales receipt or similar document;
- (d) the type of document provided under section 482 and the document's reference number;
- (e) the product name of the component sold;
- (f) the quantity of the component sold under each product name;
- (g) an indication of whether the component was sold in bulk or in packages;
- (h) if the component was sold in packages, the weight or volume of each package;
- (i) a description of how the component will be used;
- (j) if the component was shipped, the driver's licence number, the estimated and actual date of delivery, the address to which it is delivered and the quantity received; and
- (k) if the delivery was made at the time of purchase, a receipt signed by the buyer including the information required under paragraphs (a), (b) and (d) to (i).

Restricted Components - End-use Declaration

Restricted component being purchased

The chemical you are purchasing is deemed a restricted component under Part 20 of the *Explosives Regulations, 2013*. Restricted components are chemicals with legitimate uses but, when they fall into the wrong hands, they can be used to make homemade explosives. The Regulations require that the information on this form is collected prior to the purchase of a restricted component.

This form can be used to meet the requirement of an annual sales contract as described in section 484(2) or 512(2).
