

How to Apply for ENERGY STAR® Certification in Canada

Buildings that earn Natural Resources Canada’s (NRCan) ENERGY STAR certification perform in the top 25 percent of similar buildings nationwide, as verified by a Licensed Professional (a Professional Engineer or a Registered Architect). ENERGY STAR certified buildings use an average of 35 percent less energy and are responsible for 35 percent fewer greenhouse gas emissions than average buildings.¹

To qualify for the ENERGY STAR, a Canadian property must achieve an ENERGY STAR score of 75 or higher on NRCan’s 1–100 scale, which compares a property’s energy performance to that of other properties of that type, and accounts for differences in key physical and operational details. Several types of Canadian commercial buildings are eligible to earn ENERGY STAR certification, ranging from ice / curling rinks to K–12 schools to grocery stores.

Certification Eligibility Requirements

The following criteria must be met for a property to be eligible for ENERGY STAR certification:

- ✓ Meet the definition of one of the eligible property types.
- ✓ Receive an ENERGY STAR score of 75 or higher, accounting for all energy use on the entire property.
- ✓ Be located in Canada.

Certification Process Overview

1. Benchmark your property in Portfolio Manager® and achieve an ENERGY STAR score of 75 or higher.
2. Begin the online application in Portfolio Manager.
3. Have a Licensed Professional (LP) conduct a site visit, verify the information in your application and sign the application.
4. Complete the online application in Portfolio Manager, upload a scanned copy of the signed application, and submit the application electronically to NRCan.
5. Respond to questions from NRCan, if necessary.
6. Receive notification of the application’s status.

Property Types Eligible for ENERGY STAR Certification in Canada

- ✓ Hospital (General Medical & Surgical)
- ✓ K–12 School
- ✓ Ice / Curling Rink
- ✓ Medical Office
- ✓ Office
- ✓ Financial Office
- ✓ Residential Care Community
- ✓ Senior Care Community
- ✓ Food Store
- ✓ Supermarket
- ✓ Grocery Store
- ✓ Convenience Store

February 2018

1 Start the Application Process

To start the application process in Portfolio Manager, click on the property name on the **MyPortfolio** tab, and then click **Apply for ENERGY STAR Certification** near the box displaying the property's current score.

2 Enter Property Information

Provide information about your property in the following fields:

1. **Property Description:** Describe your property, including its purpose, activities that occur in the building, building occupants, size, and any other details that will help the reviewer to understand the property.
2. **Property Name for Listing Display:** Enter the name of your property as you want it to appear in the [Registry of ENERGY STAR-Certified buildings in Canada](#). This may be different from the property name in your account; it is recommended that the name be descriptive to the general public. For example, instead of "Store #123," consider "Main Street Store."

3 Choose Contacts for Application

Choose the appropriate contacts for your application.

1. Answer questions in the **Contact Information for Your Property** section, including who owns and manages the property and whether an ENERGY STAR service and product provider assists with managing property information.
2. Choose contacts in the **Contact Information for Your Application** section, including the application primary contact, the signatory, and the LP who will be verifying the application.

Application Contacts

If you have not already done so, set up contacts for your application in your contact list so they will be available for you to select during the application process. You do not need to be "connected" to these contacts unless you want to provide shared access to your property.

4 Enter Award Information

Enter award information as requested.

1. Select the type of complimentary decal you would like to receive.
2. Provide contact information for delivering your award.

Order a Complimentary Decal for your Property:

ENERGY STAR Decal (Blue and White)
Decal Language Choice: French (2) English (2) French (1)/English (1)

The ENERGY STAR Certification adhesive decal is the best way to promote your buildings' achievements. Organizations that have applied for certification and have proudly earned this title are now able to showcase their success to their employees, tenants, customers and other visitors. The decal adheres to the inside of any glass surface, and the classic blue and white ENERGY STAR Certification mark is legible from either side. Two decals are shipped in the language(s) of your choice with instructions for a clean, professional-looking application and for using the decal to create a glass plaque or display crystal, if desired.

No Decal. I only want to receive a certificate.

Choose the Certificate Language:
Certificate Language Choice: French English

5 Review Eligibility Details

NRCan will review your application for completeness and eligibility; it is important for you to review eligibility details prior to submission.

1. Select the Period Ending Date you want to use for your application. Although Portfolio Manager automatically selects the most recent 12-month period, you can select a different period. Keep in mind that the application must contain information from within 120 days of the date it is submitted.
2. Review and correct ENERGY STAR eligibility alerts identified by Portfolio Manager. The **Alerts** section indicates potential eligibility and data quality issues. Use the links to edit your information as needed, or to provide an explanation addressing the alert. Be sure to resolve all issues before submission in order to avoid having to revise and resubmit your application.
3. Click **Save for Signatures** after you have entered all required information.

Certification Requirements

Your property must meet the following requirements in order to be eligible to earn certification:

- ✓ Accurate property function/type designation, including all floor area on the property.
- ✓ Complete use details (no temporary or default values).
- ✓ 12 consecutive months of energy data for all active meters.

6 Generate Your Application for Signatures

Generate your application for signatures by clicking **Generate & Download Current Application for Professional Signatures**.

The application will include your property's basic information, property use details, energy data, and score, as well as a checklist for the LP to verify before adding a signature and stamp.

Apply for Recognition: Generate Application for Signatures

Generate Your Application for Signatures

Portfolio Manager generates a downloadable PDF of your application. Your application must be signed and stamped by a qualified **Licensed Professional** (ie. Professional Engineer (PE/P.Eng) or Registered Architect) before it is submitted.

[Generate & Download Current Application for Professional Signatures](#)

[Back](#) [Save](#) [Continue](#) [Cancel](#)

7 Enter Site Visit Information

The LP, or a representative working under the direct supervision of the LP, must visit your property during the application process to verify the following items in accordance with the instructions provided in the [ENERGY STAR Licensed Professional's Guide](#):

- ✓ All energy use is accounted for accurately.
- ✓ The property use details have been properly reported (including the gross floor area of the building) and the property meets ENERGY STAR eligibility requirements.
- ✓ The property meets minimum occupancy requirements.
- ✓ The indoor environmental quality meets industry standards for air quality, thermal comfort, and illumination.

NOTE: To find an LP to conduct your site visit, contact the regulatory body in your province or territory. Visit [Engineers Canada](#) for a listing of provincial/territorial licensing bodies.

Licensed Professionals

A Licensed Professional (LP) must validate the information that appears on an application for ENERGY STAR certification. NRCan requires that the LP possess a current license as a Professional Engineer (P.Eng) or a Registered Architect in any Canadian province or territory, or in the United States, be in good standing, and have a working knowledge of building systems.

After your site visit is complete, fill in the **Site Visit** section of the application.

- ✓ Enter the date on which the site visit took place.
- ✓ Select from the drop-down menu the individual who performed the site visit.
- ✓ Select **Yes** or **No** to indicate whether the LP found any issues with your application. If you select **Yes**, you will be directed to the **Revise & Regenerate Application** page.

Revise & Regenerate

If the LP identifies issues that require correction on your application, you will need to edit information on the **Revise & Regenerate Application** page in Portfolio Manager.

- ✓ Edit your basic property information, function type, or consumption information as needed.
- ✓ Regenerate and print the application for signatures.

8

Submit Your Application

You are now ready to submit your application to NRCan!

1. Enter the tracking number from the signed application in the appropriate space within the online application in Portfolio Manager and check the necessary boxes. **NOTE:** The tracking number is located on the bottom right-hand corner of every page of the application.
2. Attach a scanned PDF of the signed application.
3. Validate your credentials by entering your Portfolio Manager username and password, and then click **E-Sign Application**.
4. Complete your application by clicking **Submit**.

Apply for Recognition: Submit Application

Attach Signed Document
Scan and attach a signed and stamped copy of your application. This includes a stamp and signature from your licensed professional (in the site visit section) and a signature from your Signatory. The signatures must be on the [most recent saved version of your application](#).

Application Tracking Number: APP-YYYYMMDD-0000-00000
The application tracking number ensures that the signed copy you are submitting is the most recently saved version of your application. You can find your tracking number in the footer of every page of your application.
[See Example](#)

Signed and Stamped by the Licensed Professional
 Signed by the Signatory

Attach Signed Document: No file chosen
Click "Browse" to select the application file on your computer.

Your Application Process

- ✓ About Your Property
- ✓ Contact Information
- ✓ Award Information
- ✓ Eligibility Details
- ✓ Generate for Signatures
- ✓ Site Visit
- ✓ Revise & Regenerate
- ➔ **Submit Application**

About Submitting Your Application

EPA no longer requires you to mail the original of your application. You can keep those for your files. You do, however, need to scan and upload a signed and stamped copy of your application.

Once your application has been submitted ...

- ✓ View your application's status on the **Recognition** tab by clicking the gray arrow next to your property's name.
 - If NRCan has any questions or issues, the primary contact specified during the application process will receive the questions by email.
 - If you have any questions, email nrcan.energystarcertificationbuildings.nrcan@canada.ca.
- ✓ Get ready to promote your accomplishments! Spread the word with our ready-to-use [ENERGY STAR promotional toolkit!](#)
- ✓ Start preparing for next year! A property that has earned the ENERGY STAR becomes eligible to reapply one year after the period ending date for the previous application.

Spot Audits

On a regular, ongoing basis, NRCan will randomly select applications to undergo a spot audit. NRCan may ask for any of the following information:

- ✓ Copies of all the utility bills and invoices for fuel purchases within the period of performance.
- ✓ Documentation and/or explanation of how the building attributes were verified.
- ✓ Explanation of how the LP assessed the indoor environmental quality.
